

RV08

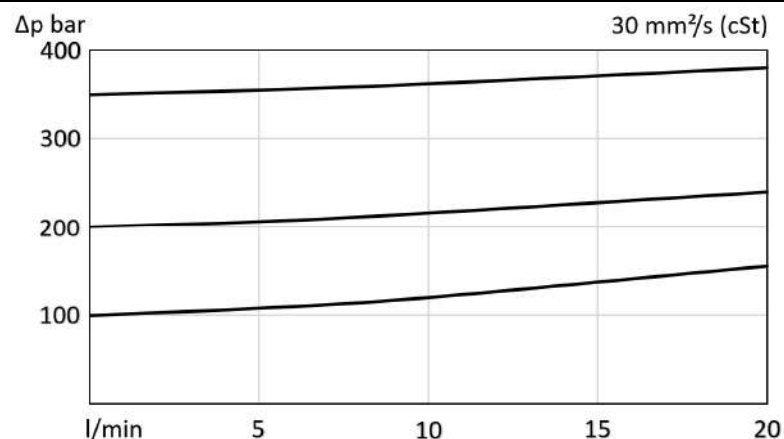

(mm)

Description

Pressure limiting valve are a type of pressure control valve. This valve blocks flow from port 1 to port 2 until there is sufficient pressure at port 1 to force the piston from its seat thus opening the valve.
All external parts zinc plated.

SPECIFICATIONS

Maximum Operating Pressure	400 bar
Rated Flow	20 lpm
Cavity	SAE08-20
Cleanliness Class (ISO 4406)	21/18/15...19/17/13
Viscosity Range	10 ... 500 mm²/s (cSt)
Temperature Range (fluid)	-25 ... +80°C
Tightening torque	50 Nm (± 5 %)
